

QP Technologies Partners with AnySilicon

TEL AVIV, Israel – November 18, 2021 – AnySilicon, the leading marketplace for semiconductor service providers, announced today that QP Technologies, a worldwide leader in packaging and assembly services, has partnered with AnySilicon to promote its IC packaging and assembly services. As part of the AnySilicon platform, QP Technologies will gain access to a full range of online marketing services to showcase its offering, increase exposure and generate leads.

AnySilicon is an online marketplace linking semiconductor service providers and companies in search of vendors. Covering ASIC design, IC packaging, IP cores, verification, validation, testing, and turnkey service providers, the AnySilicon site allows companies to easily find semiconductor services anywhere in the world with specific domain expertise that matches their needs.

About QP Technologies

Escondido, Calif.-based QP Technologies (formerly Quik-Pak), a division of [Promex Industries](#), provides wafer preparation, IC packaging and assembly, and substrate design and fabrication services in its 20,000-square-foot ISO 9001:2015/ISO-13485:2016-certified, ITAR-registered facility. The company's over-molded QFN/DFN packages and pre-molded air-cavity QFN packages offer a fast, convenient solution for customer needs ranging from prototype to small-volume production. Same-day assembly services reduce customers' time to market, while advanced assembly services can accommodate such structures as flip-chip, stacked die, SiP, chiplets, MCM and CoB. For more information, visit www.qptechnologies.com, or call 858-674-4676.

About AnySilicon

Founded in 2011, AnySilicon is the best way to explore, find and contact semiconductor service providers and IP vendors online. AnySilicon is a unique ASIC services and IP marketplace that covers all domains starting from ASIC design to production and also an IP portal to help ASIC decision makers find the best partner with the right solution, best cost and shortest time to market. AnySilicon is part of the [HardwareBee](#) network.
